Autobrite

Autobrite Cherry Glaze

Wash, rinse and dry vehicle thoroughly first.

Shake product well before use!

Apply a small amount of Cherry Glaze to a sponge applicator pad or machine polisher pad.

Work into the paintwork with a light pressure.

Leave for 2 - 3 minutes before removing.

Cherry Glaze can be used on plastic, chrome and alloy and steel wheels.

Autobrite Liquid Gold Polish

Wash, rinse and dry vehicle thoroughly first.

Shake product well before use!

This product is a medium cutting compound.

Apply a small amount of Liquid Gold to a sponge applicator pad or machine polisher pad.

Work into the paintwork with a medium - light pressure.

Remove with a good quality microfibre cloth.

Autobrite Luxury Suds

Hose or pressure wash vehicle thoroughly.

For a heavily soiled vehicle dilute your 50ml bottle to a bucket of 5 litres of water.

For a lightly soiled vehicle dilute your 50ml bottle to a bucket of 10 litres of water.

Apply with a clean sponge or wash mitt.

Rinse with clean water and then dry off vehicle.

Autobrite Very Cherry Acid-Free Wheel Cleaner

Clean any excess dirt off the wheel before using.

Pour into a spray bottle.

For heavily soiled wheels dilute 1:5

For lightly soiled wheels dilute up to 1:20

Test on an inconspicuous area of the wheel first.

Spray onto wheel, use a wheel brush to agitate dirt and afterwards rinse off the product thoroughly.

If it is all okay, use on the rest of the wheels to the instructions above.

Ensure the dwelling time and dilution rate of the product matches the type of wheels you are using the product on.

Chemical Guys

Chemical Guys Diablo Rim & Wheel Cleaner Gel

Safe for all wheels.

Clean any excess dirt off the wheel before using.

Pour into a spray bottle and water down up to a 1:6 ratio or as needed.

Test on an inconspicuous area of the wheel first.

Spray onto wheel and leave to dwell, use a wheel brush or sponge to agitate dirt and afterwards rinse off the product thoroughly.

If it is all okay, use on the rest of the wheels to the instructions above.

Diablo can sit or dwell as long as needed.

Not for use on paint.

Chemical Guys Extreme Bodywash + Wax

Hose or pressure wash vehicle thoroughly.

Fill wash bucket with around 7 litres (1.8 U.S Gal.) of water.

Mix in around 2.5ml (.08 fl oz) of your sample bottle.

Apply with a clean sponge or wash mitt.

Rinse with clean water and then dry off vehicle.

Chemical Guys Scratch+Swirl B-Gonez

Wash vehicle thoroughly first.

Test the product on an inconspicuous panel first.

Apply a small amount onto a sponge applicator, microfibre cloth or if using a machine polisher, a pad.

Work lightly into paintwork using a circular motion, apply slightly more pressure if needed.

Leave to haze.

Buff off using a microfibre cloth.

Apply to rest of panels if okay.

If using Scratch+Swirl B-Gone with a machine Polisher, use it the same way as you would with other compounds.

Dodo Juice

Dodo Juice Blue Velvet PRO

Suitable for any colour of vehicle.

Wash vehicle thoroughly first.

Prep paint using Dodo Juice Need for Speed (if necessary).

Apply a small amount of Blue Velvet PRO by hand or by sponge applicator.

Leave for a few minutes or until hazing occurs. Do not let it 'cake' on.

Buff off with a microfibre cloth.

Dodo Juice Born Slippy Clay Lube Concentrate

This is a dedicated clay lube that enhances the cleaning effect of the clay, helping your clay bar to glide across the surface of the bodywork, minimising the risk of marring.

This 50ml bottle will make 500ml of clay lube.

Pour the product into a spray bottle and water down the product to a ratio of 10:1

The spray bottle you use can sometimes 'gum up' inside the nozzle. If this happens, take out the nozzle and pump hot water through until it is working properly again.

Dodo Juice Detailing World Double Wax

For any colour of vehicle.

Wash vehicle thoroughly first.

Prep paint using Dodo Juice Need for Speed (if necessary).

Apply a small amount of Detailing World Double Wax (Blue pot) by hand or by sponge applicator as a base coat.

Leave for a few minutes or until hazing occurs. Do not let it 'cake' on.

Buff off with a microfibre cloth.

Next, and again, apply small amount of Detailing World Double Wax (Green pot) by hand or by sponge applicator as a top coat.

Leave for a few minutes or until hazing occurs. Do not let it 'cake' on.

Buff off with a microfibre cloth.

With these waxes, it's recommended that to get the best results, apply 2 layers or more of each.

Dodo Juice Hard Candy

Suitable for any colour of vehicle.

Wash vehicle thoroughly first.

Prep paint using Dodo Juice Need for Speed (if necessary).

Apply a small amount of Hard Candy by hand or by sponge applicator (as it is a hard wax it is best applied by applicator).

Leave for a few minutes or until hazing occurs. Do not let it 'cake' on.

Buff off with a microfibre cloth.

Dodo Juice Lime Prime

Thoroughly wash the vehicle first.

To apply:

By hand - Use with a microfibre applicator pad. Work a small section at a time (quarter of bonnet, half wing etc) using a small 5p size amount of product, work until clear then buff residue. You can use multiple hits straight after the other. To prevent the risk of marring ensure you use reasonable pressure and work until clear to ensure the mild abrasives have fully broken down.

Via Dual Action Machine Polisher - It's best used on a Polishing/Finishing pad, use a line and 2x 5p size blobs of product for the first hit, for the second hit 4x 5p size blobs dotted around the pad. Spread at speed 1, work up to speed 2/3, then finish with passes at speed 4/5 until worked clear. Use medium pressure to ensure the product is worked.

Via Rotary Machine Polisher - It's best used in a Polishing pad. Use similar amounts of product, however spread at 900rpm, work up to 1200rpm, then work at 1200-1800rpm's until clear. You can carry out multiple hits to give an improved result.

Dodo Juice Mellow Yellow Wheel Cleaner

Ensure the dwelling time and dilution rate of the product matches the type of wheels you are using the product on.

Clean any excess dirt off the wheel before using.

Pour into a spray bottle and water down to a 1:1 ratio.

Test on an inconspicuous area of the wheel first.

Spray onto wheel, use a wheel brush to agitate dirt and afterwards *rinse off the product thoroughly*.

If it is all okay, use on the rest of the wheels to the instructions above.

Dodo Juice Need for Speed

Wash vehicle thoroughly first.

Shake bottle.

Using a sponge applicator or microfibre cloth, apply a small amount to an inconspicuous panel (to test).

Leave for approx. 5 minutes or until hazing occurs

Do not let it 'cake' on (especially on warm days) or removal could be difficult.

Buff off with a microfibre cloth.

Apply to other panels if okay.

Do not use on textured plastic due to powdering.

Dodo Juice Purple Haze PRO

Suitable for any colour of vehicle.

Wash vehicle thoroughly first.

Prep paint using Dodo Juice Need for Speed (if necessary).

Apply a small amount of Purple Haze PRO by hand or by sponge applicator.

Leave for a few minutes or until hazing occurs. Do not let it 'cake' on.

Buff off with a microfibre cloth.

Dodo Juice Rainforest Rub

For any colour of vehicle.

Wash vehicle thoroughly first.

Prep paint using Dodo Juice Need for Speed (if necessary).

Apply a small amount of Rainforest Rub by hand or by sponge applicator.
Leave for a few minutes or until hazing occurs. Do not let it 'cake' on.
Buff off with a microfibre cloth.

Dodo Juice Rubbishboy's Juiced Edition

Suitable for any colour of vehicle.

Wash vehicle thoroughly first.

Prep paint using Dodo Juice Need for Speed (if necessary).

Apply a small amount of Rubbishboy's Juiced Edition by hand or by sponge applicator.

Leave for a few minutes or until hazing occurs. Do not let it 'cake' on.

Buff off with a microfibre cloth.

Dodo Juice Sour Power

Hose or pressure wash vehicle thoroughly.

Fill wash bucket with warm water.

Mix in around 1/3rd of your sample bottle of Sour Power until it foams.

Apply with a clean sponge or wash mitt.

Rinse with clean water and then dry off vehicle.

Dodo Juice Supernatural Shampoo

Hose or pressure wash vehicle thoroughly.

Fill wash bucket with around 7 litres of warm water.

Mix in around 1/5 of your sample bottle of Supernatural Shampoo until it foams.

Apply with a clean sponge or wash mitt.

Rinse with clean water and then dry off vehicle.

Dodo Juice Supernatural Wax

For any colour of vehicle.

Wash vehicle thoroughly first.

Prep paint using Dodo Juice Need for Speed (if necessary).

Apply a small amount of Supernatural Wax by hand or by sponge applicator.

Leave for a few minutes or until hazing occurs. Do not let it 'cake' on.
Buff off with a microfibre cloth.

ValetPRO

ValetPRO Achilles Prep

Wash vehicle thoroughly first.
Test the Achilles Prep on an inconspicuous panel first.
Apply a small amount onto a sponge applicator or microfibre cloth.
Work lightly into paintwork using a circular motion, apply slightly more pressure if needed.
Leave to haze.
Buff off using a microfibre cloth.
Apply to rest of panels if okay.

Valet PRO Argus Leather Cream

Not suitable for Aniline Leather
Always test Argus on an inconspicuous area first
Clean leather using a brush sponge and argus leather cream. Agitate into the leather and wipe up using a budget microfibre cloth. Repeat until leather is clean.
Protect leather - Once clean reapply the Argus Leather Cream with a soft sponge. Apply a thin, even coat and allow to dry. Buff with a clean, dry budget microfibre cloth. Your leather will now be clean and protected.

Future cleans are much easier as the protect stage is not necessary. Just use the Brush Sponge again, agitate and wipe off. Regular cleaning will build a good and improved level of protection.

ValetPRO Artemis Wax Seal

Wash vehicle thoroughly first.
Use a paint prep product first (if necessary).

Apply a small amount of Artemis Wax Seal by an applicator pad to one panel at a time. Leave for 5 - 10 minutes to cure.

Buff off with a microfibre cloth.

Apply a second layer if necessary.

Valet PRO Bilberry Safe Wheel Cleaner

Put the Bilberry Wheel Cleaner into a spray bottle. Depending on how dirty your wheels are you can use it neat or dilute it up to 1:10 parts water.

Clean any excess dirt off the wheel before using.

Test on an inconspicuous area of the wheel first.

Spray onto wheel, use a wheel brush to agitate dirt and afterwards rinse off the product thoroughly.

If it is all okay, use on the rest of the wheels to the instructions above.

Using this product neat or up to a 1:3 dilution rate you can clean wheels without touching them. Simply spray the product on, rinse thoroughly with a pressure-washer and hey presto, the job is done. This is a nice smelling product and is hard to beat for value and effectiveness.

Valet PRO Blue Gel Wheel Cleaner

This is a hydrochloric acid based wheel cleaner. The gel allows the product to cling to the wheel for longer and also helps slow down the drying time. This product is far more effective than other products with a higher concentration of hydrochloric acid. It is a heavy duty wheel cleaner designed to remove the most stubborn brake dust and restore the most abused wheels. A powerful acid wheel cleaner that will not turn your lungs inside-out when using it due to its unique gel formula.

This is a high quality Pro-valeter product which is also used by pro-detailers to remove stubborn brake dust. It is a powerful but pleasant to use acidic wheel cleaner.

Clean any excess dirt off the wheel before using. Pour into a spray bottle and water down to a 1:1 ratio or use neat. Test on an inconspicuous area of the wheel first.

Spray onto wheel, use a wheel brush to agitate dirt and afterwards rinse off the product thoroughly.

If it is all okay, use on the rest of the wheels to the instructions above.

Ensure the dwelling time and dilution rate of the product matches the type of wheels you are using the product on.

It can be applied with either a chemical resistant trigger or double action trigger, neat or diluted 1:1. You can also use the Venus Pro pump sprayer which works very well and will last well too!

Valet PRO Citrus Bling

This is a multi-purpose product. Here's what you can use it for and how to use it.

Fast wax – As a fast wax the product is either used neat or diluted 1:1. It is a simple process of spray and wipe. It delivers an exceptional shine with very little effort and will last about 3 weeks. A car can be 'Citrus Blinged' (Citrus Bling does not contain wax) in a matter of minutes delivering that 'just waxed' look on both new and good quality paintwork.

Drying aid – Some of our customers have informed us that they use Citrus Bling as a drying aid diluted 1:3. After a quick spray on a panel and wipe down with a drying towel, Citrus Bling will speed up the drying process and also add gloss to the paint work, giving an impressive finish to just a wash.

Quick detailer – Citrus Bling can be diluted 1:3 and up to 1:8 which gives exceptional value.

Glass cleaner – Dilute up to 1:5

Clay lube – This is definitely an area where Citrus Bling excels. Dilute up to 1:16 parts water.

Paint cleanse and gloss enhancer – Citrus Bling contains orange peel derivatives that help clean the paint surface when used neat. This process removes tar, tree sap and other contaminants. Make sure you wipe up with a good quality microfibre afterwards. This process gives the paintwork extra gloss prior to wax application.

Multi- purpose – Used neat or diluted 1:1 you can clean and protect wheels and door shuts with ease. It is also exceptionally good for cleaning and protecting VDU (use a soft microfibre cloth).

Valet PRO Citrus Tar & Glue Remover

Always carry out a spot test on an obscured area before full application.

Apply the product to a soft cloth and wipe over the affected area on the car until the tar and glue has been removed.

After this, go over again with another soft cloth to remove the excess.

ValetPRO Concentrated Car Shampoo

Our Concentrated Car Shampoo is a powerful PH neutral car shampoo.

Just add 10 to 30ml of product per 5L of water. Use with warm water for even better results.

ValetPRO Dionysus Trim Glitz

Application:

Used a sponge applicator and pour on a 15mm sized blob. It's quite a thick product in texture and a little goes quite far. After applying it, for best effect, leave it for around 5 minutes and then removed the excess with a soft M/F cloth. After another 5 minutes, buff it again.

ValetPRO Enzyme Odour Eater

Enzyme Odour Eater is great for both the normal user and also valeters. It removes, not masks, bad smells and also breaks down the organic source that the bacteria producing the smells thrive on, making it a lot easier to remove stains from carpets and upholstery. It can be used on cars and also in the home or work place and has a pleasant Lemon scent to it. An excellent product which can be diluted up to 5:1.

In-depth description of Enzyme Odour Eater.

Enzyme Odour Eater remove odours from cars, homes and the work place. The product is particularly special because it removes the organic food source that bacteria thrive on (it is the bacteria that produces the bad smells). This also makes it a great preparation cleaner product for organic stains and is used by carpet cleaners to remove Tea stains from carpets (enzyme odour eater is wool safe). Valeters use this product to pre-spray carpets and upholstery due to its effectiveness for removing organic stains. The carpets and upholstery get sprayed while the valeter washes the exterior. By the time the valeter gets on the inside most of the stains are gone thus making the whole cleaning process much quicker and easier.

Its main purpose, however, is odour control. It will deal with all manner of bacteria related odours such as:

- Spilt milk (or any other drink)
- Vomit and other bodily fluids. Used in nursing homes.
- Dog odours.
- Tobacco (also great for removing stains on head lining)

This product is perfect for cleaning head lining as it is PH neutral. Due to high alkaline some cleaners can damage the glue used to stick on head linings, which is why we recommend Enzyme Odour Eater for this job.

It can be also used in sinks and washrooms.

ValetPRO Glass Cleaner

This glass cleaner works very well both inside and outside glass. Its cleaning power is excellent for removing the likes of tobacco and bug splats.

Put a small amount onto preferably a glass cleaner microfibre cloth, wipe across the surface and then buff clean with the clean and dry side of the cloth.

ValetPRO Heavy Duty Extraction Cleaner

Carpet Cleaner

A powerful carpet and upholstery cleaner. Designed to be used through an extraction machine but can also be used as a spot cleaner.

This carpet cleaner is designed to suspend grime in the cleaning solution allowing easy and fast extraction of carpets and upholstery. This is quite possibly the fastest carpet cleaner available.

Can be used on man made fibre which most car interiors use, heavy traffic carpets for pubs and clubs etc but is not suitable for wool carpets.

It has a good dilution rate of 1:80 which in a carpet cleaner is excellent, thus 5 litres will make 405L of carpet cleaner. Dilute 1:10 to use as a pre spray product

ValetPRO High Gloss Tyre Dressing

Tyres:

Ensure all areas are clean and dry, apply by trigger spray directly onto the tyre, or apply with a brush, application sponge. Allow to dry.

This product can also be used on car interior plastics, vinyl and rubber:

Simply apply the product as you would on a tyre and when dry buff off with a microfibre cloth to achieve extra gloss.

ValetPRO House Wax

Apply with a sponge applicator, spread a thin layer over the entire vehicle. Leave to dry and buff off to a high shine. It will last between 6 - 8 weeks depending on the level of prep beforehand.

ValetPRO Interior Cleaner

If you have an empty sprayer bottle, decant the Interior Cleaner into it and follow the instructions below.

When cleaning interior plastics, dilute the product to 1:10 and spray all effected areas. Leave for a few minutes for the interior cleaner to break down heel marks and dirt. After this, agitate with one of our Brush Sponges, wipe dry with one of our microfibre clothes (either Ultra Fine or Budget). Heel marks and grime will wipe clean off.

If you don't have a sprayer, simply dilute the product in another bottle, put a small amount onto a soft microfibre cloth or sponge and do the same as you would with a spray gun except apply it with the cloth or sponge instead.

ValetPRO Long Life PDI

This is a high quality wax. PDI stands for Pre Delivery Inspection.

Long life PDI gives a high gloss shine that lasts for around 6 weeks. It is easy to apply and buffs to a great shine. It will not mark rubbers and black plastic bumpers. It can be used in direct sunlight without effecting the quality finish.

This is a first rate product that will save you time and effort whilst delivering a professional finish.

ValetPRO Orion's Shield

Orion's Shield is a paint sealant designed to last 3 plus months. It's quick and easy to use with excellent results. The gloss shine is impressive and its durability is very easily extended by simply using our Poseidon's Carnauba Wash and our Artemis Wax Seal.

In-depth

Orion's Shield is a thick cream that spreads nice and evenly and bonds hard to paint work, giving a long lasting finish.

The durability can be increased by preparing the surface with our Achilles Prep product and this will also increase the depth of shine.

The gloss shine is superb with this product and it can also be used as a base coat prior to using our Artemis Wax Seal and thus increases the durability.

If you are a detailer or valeter, this product will definitely give your services extra value. Maintain the finish by washing with Poseidon's Carnauba wash.

There are two options for preparing the paint surface for Orion's shield

Quick option

Apply Citrus Tar and Glue Remover over lower seals with a soft sponge. Watch as tar spots appear and start dissolving, then reapply Citrus Tar and Glue Remover and wipe excess using a microfibre cloth. Then clean the paint work further by using Citrus Bling neat. Citrus Bling cleans and gives a deeper shine to the paint work. This option is a much faster way of preparing the paint surface but is not going to give perfect results. But the results will still be exceptional.

Best practice

Basic option above plus - Using citrus bling diluted 1:16 and a clay bar, removes the rest of the contaminates. To deep clean the paint work and remove and hide paint work imperfections use Achilles prep, preferably applied by DA or rotary (low speed). This process will ensure you get the maximum life out of Orion's Shield giving incredible endurance and depth of shine.

ValetPRO Poseidon's Carnauba Wash

Hose or pressure wash vehicle thoroughly.

Add your sample bottle to 5 litres (1.3 Gallons U.S) of water (warm water preferably).

Mix thoroughly until mixtures foams.

Apply with a clean sponge or wash mitt.

Rinse off and dry car.

ValetPRO Professional Tyre Dressing

Can be used on wet or dry tyres, although the product gives a better result if applied on a dry surface.

Apply by trigger spray directly onto the tyre, or apply with a brush or application sponge. Allow to dry. Buff off with a microfibre cloth.

Valet PRO Protectant

This is a very special product. It is a dressing come protectant and will protect plastic, rubber and leather surfaces from UV rays. It is weather resistant so can be used on external plastics and rubber too. It will also prevent discolouration of leather.

It is also water based which also means it can be diluted to the finish required.

High Gloss - use neat

High Sheen - 1:1

Soft Sheen - 1:2

Matt - 1:4

Can be used to dress, rejuvenate and protect tyres, exterior plastics, interior plastics, rubber and leather.

Valet PRO Vinyl Clean and Sheen

Vinyl Clean and Sheen is a non-silicone dressing for interiors.

On the interior it will clean and dress the vinyl to a soft sheen finish with ease.

Either decant the product into a spray bottle, then spray and wipe up with a general purpose microfibre cloth.

Or simply put a small amount of the product onto a microfibre cloth and wipe around the area.

It is not weather resistant so will only suit interior plastics

Valet PRO Wash and Protect Concentrate

Wash and Protect is a high quality car shampoo designed to be economical for maintaining cars at car dealerships as well as for using at home. It only takes 10 to 30ml of product per 5L bucket of water to get great cleaning power which also leaves an extra shine to paint surfaces. It includes rust inhibitors which will help prevent rust.

Wash and protect has fast cleaning power and it improves drying time. This product also works well through a foam lance.

ValetPRO Yellow Bumper Gel

After cleaning the area thoroughly, apply a small amount of the Yellow Bumper Gel with a sponge. Leave for a short while and then remove the residue with a soft microfibre cloth.

This is a dressing for exterior plastic bumpers. It is a thick yellow gel with a slight hint of Lemon and the product will stay thick even on the hottest of days. The protection will last for around 1 month and is has been designed to revive dull plastics but some plastics can be too far gone for even Yellow Bumper Gel to revive - in these circumstances use our Protectant product. Yellow Bumper Gel offers great protection in all weathers and gives exterior plastics a fresh gloss finish. It is easy to use and apply plus if it gets on paintwork it buffs off easily. It is also silicone free and so is safe for body shop use.

PRIMA Car Care

PRIMA Banana Gloss (Premium Liquid Wax)

Wash, rinse and dry vehicle thoroughly first.

Shake product REALLY well before use!

Apply using a clean sponge applicator pad.

Spread thinly over the entire vehicle.

Wait until product hazes over and remove using a microfibre cloth.

Don't worry about getting Banana Gloss on plastic or rubber trim as it won't leave any white residue behind.

PRIMA Epic (Synthetic Wax)

Wash, rinse and dry vehicle thoroughly first.

Shake product REALLY well before use!

Use product only on cool paint and keep out of sunlight.

Apply using a clean sponge applicator pad.

Spread thinly over the entire vehicle.

Wait 30 minutes and buff off using a good microfibre cloth.

If you want to apply another coat of Epic, wait 24 hours to do so.

Avoid plastic and rubber trim!

PRIMA Glide (Clay lubricant)

Wash, rinse and dry vehicle thoroughly first.

Shake product well before use!

Empty your Glide sample into a spray bottle.

Spray a mist of Glide onto a small area of bodywork.

Use clay bar as you would normally.

Glide is safe to use on glass, fibreglass, chrome, plastics and all paint types.

PRÍMA Mystique (Car Shampoo)

Shake product well before use!

For a lightly soiled car use 1/4 of your 50ml sample in a 9 litre (2.3 US Gal.) bucket.

For a heavily soiled car use 1/2 of your 50ml sample in a 9 litre (2.3 US Gal.) bucket.

After each panel you wash, rinse off the Mystique with clean water.

Do not use in direct sunlight.

PRÍMA Swirl (Swirl remover and polish)

Wash, rinse and dry vehicle thoroughly first.

Shake product REALLY well before use!

Avoid plastic and rubber trim.

Apply using a clean sponge applicator pad and work on a 2 feet by 2 feet area.

Remove using a microfibre cloth.

Swirl can also be applied by any variation of machine polisher.

StjärnaGloss

StjärnaGloss Hjul pH Neutral Wheel Cleaner Instructions

Safe for all wheels. Clean any excess dirt off the wheel before using.

Pour into a spray bottle and water down to your preferred dilution rate.

If your wheel are extremely dirty, you can paint Hjul straight on with a wheel brush.

For very dirty wheels, use at a 1:5 dilution rate.

For mildly dirty wheels use at a 1:15 dilution rate.

Test on an inconspicuous area of the wheel first.

Spray onto wheel, use a wheel brush or sponge to agitate dirt, and then leave to dwell and afterwards rinse off the product thoroughly.

If it is all okay, use on the rest of the wheels to the instructions above.

If you use a pressure washer, use a spray bottle and spray on your diluted Hjul, leave for 5 minutes, and then wash off.

StjärnaGloss Körsbär

Rinse car thoroughly.

For a lightly soiled car add 1/6th of your Sample bottle to 8 litres of warm water

For a heavily soiled car add 1/3rd of your Sample bottle to 8 litres of warm water

Wash car with a wash mitt or sponge, rinse with clean water and dry vehicle off with a microfibre cloth or leather chamois.

StjärnaGloss Red Snö Instructions

NOTE: This product will stain. Please be careful when using it near your clothes, and wear plastic gloves if necessary. The stain will come out of your skin easily enough with warm water, washing-up liquid and a plastic brillo pad. If your car is a lighter colour, try the product out on just one inconspicuous panel first.

Can be used diluted between 1:2 and 1:20. If your vehicle is particularly dirty, a mixture of between 1:5 and 1:10 is probably necessary.

After application to your vehicle, you can either use a wash mitt or sponge to clean the car, or simply leave the Red Snö to settle a minute before using a pressure washer to rinse it off.

If the weather is particularly hot and the bodywork is also very warm, it is recommended that you only do 1 - 2 panels at a time before rinsing the snow foam off.

After you've rinsed off the vehicle, use a soft microfibre cloth to dry all excess water off.

StjärnaGloss Tangerine Wash and Gloss

Rinse car thoroughly.

For a lightly soiled car add 1/6th of your Sample bottle to 8 litres of warm water

For a heavily soiled car add 1/3rd of your Sample bottle to 8 litres of warm water

Wash car with a wash mitt or sponge, rinse with clean water and dry vehicle off with a microfibre cloth or leather chamois.

IONCOAT Naviwax

Ioncoat Naviwax Dark

- *Caution: Flammable Product*
- Wash vehicle thoroughly first.
- If necessary Use a paint prep product first.
- Apply a *very* small amount of Naviwax Dark with a damp sponge applicator to an area of bodywork around 45 cm x 45 cm at a time.
- **Leave for *only* around 30 seconds and no longer! There is no curing time.**
- Buff off with a microfibre cloth.
- Apply a second layer if necessary.

Ioncoat Naviwax Light

- *Caution: Flammable Product*
- Wash vehicle thoroughly first.
- Use a paint prep product first (if necessary).
- Apply a *very* small amount of Naviwax Dark with a damp sponge applicator to an area of bodywork around 45 cm x 45 cm at a time.
- **Leave for *only* around 30 seconds and no longer! There is no curing time.**
- Buff off with a microfibre cloth.
- Apply a second layer if necessary.

Naviwax Ultimate

- *Caution: Flammable Product*
- Wash vehicle thoroughly first.
- Use a paint prep product first (if necessary).
- Apply a *very* small amount of Naviwax Ultimate with a damp sponge applicator to one panel at a time.
- **Remove the wax within one or two minutes of applying it (less in hot conditions).**
- Buff off with a microfibre cloth.
- Apply a second layer if necessary.

www.carproductstested.com
